## Meeting Minutes for Meeting of July 6, 2017

Dan Lee opened the meeting at 12:25 introducing Toyota guest speakers Toyota Rose Bayat (Director of Customer Relations) and Tom Bronk (Master Diagnostic Technician). Tom began by explaining Toyota's Goals and Mission Statement. His presentation provided a history of the technological improvements that have been made to automobiles since the fuel crisis of the early 1970's and an outlook on what is expected in the next 50 years (i.e., all electric cars). The presentation was followed by questions from and answers to the members present. Particularly noteworthy was his explanation of wheel alignment using his "alignment dance" to explain the three angles of alignment (toe, camber and caster).
