

Thunderbird Email

- Web-based vs. email client
- www.thunderbird.net

Thunderbird

1. Import email account
2. Set preferences
3. Tweak account settings
4. Customize interface

Thunderbird

5. Dealing with message content

- Filtering
- Creating folders
- Sorting
- Searching

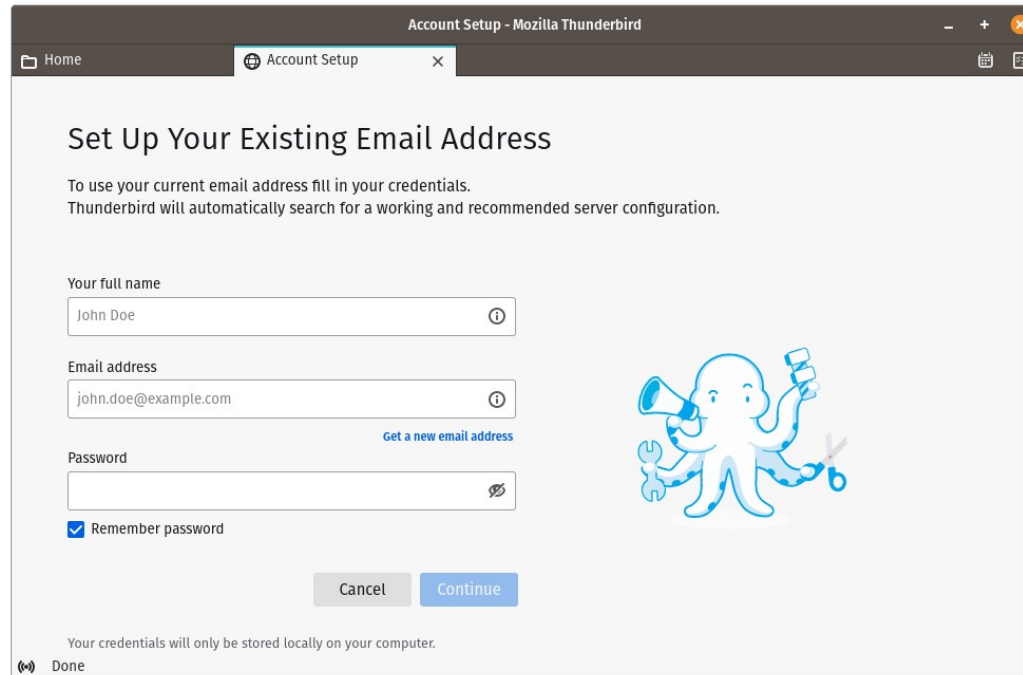

6. Import contacts

7. Compose new message

8. Import additional email accounts

Screenshots for Setup

Connect to existing email account and integrate the account into Thunderbird

The screenshot shows the 'Account Setup - Mozilla Thunderbird' window. The title bar includes 'Home' and 'Account Setup' tabs. The main heading is 'Set Up Your Existing Email Address'. Below this, a message states: 'To use your current email address fill in your credentials. Thunderbird will automatically search for a working and recommended server configuration.' The form contains three input fields: 'Your full name' with the value 'John Doe', 'Email address' with the value 'john.doe@example.com', and 'Password'. A link 'Get a new email address' is positioned below the email field. A checkbox labeled 'Remember password' is checked. At the bottom are 'Cancel' and 'Continue' buttons. A cartoon octopus holding tools is on the right. A footer note says 'Your credentials will only be stored locally on your computer.' and a 'Done' button is at the bottom left.

Account Setup - Mozilla Thunderbird

Home Account Setup

Set Up Your Existing Email Address

To use your current email address fill in your credentials.
Thunderbird will automatically search for a working and recommended server configuration.

Your full name

Email address

[Get a new email address](#)

Password

☒ Remember password

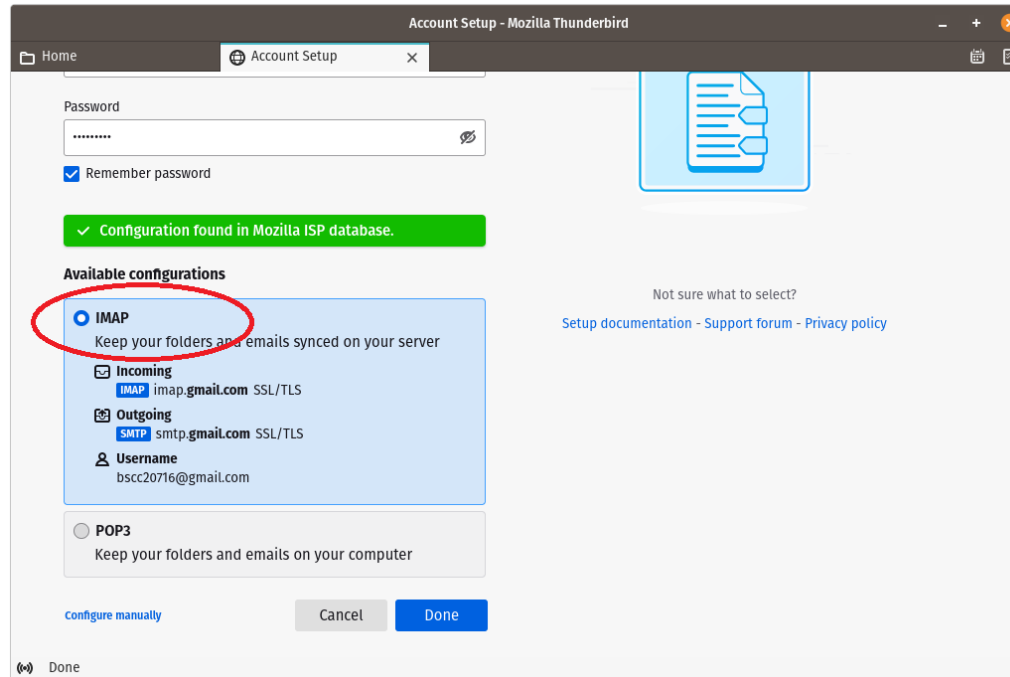

Cancel Continue

Your credentials will only be stored locally on your computer.

Done

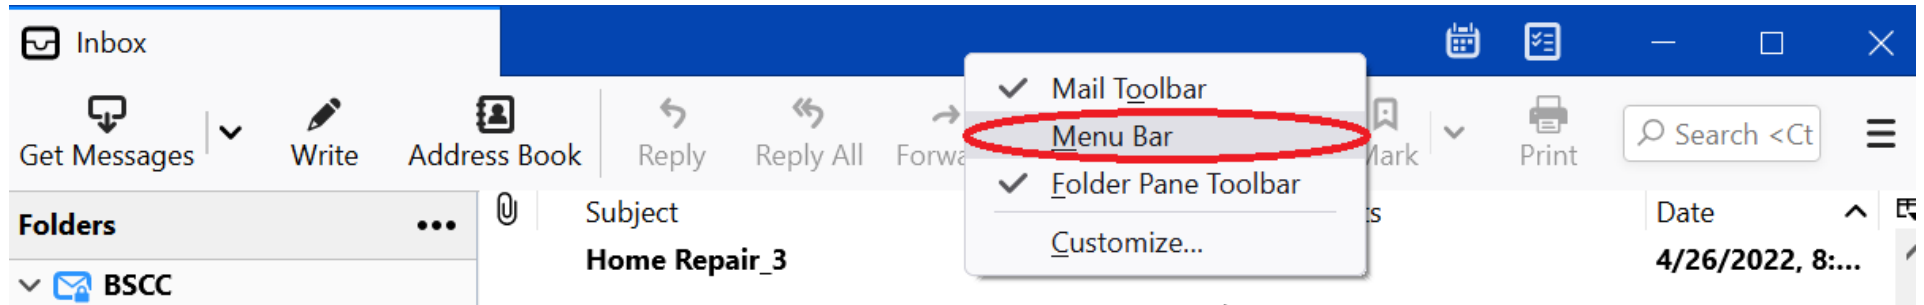

Integrate account as IMAP

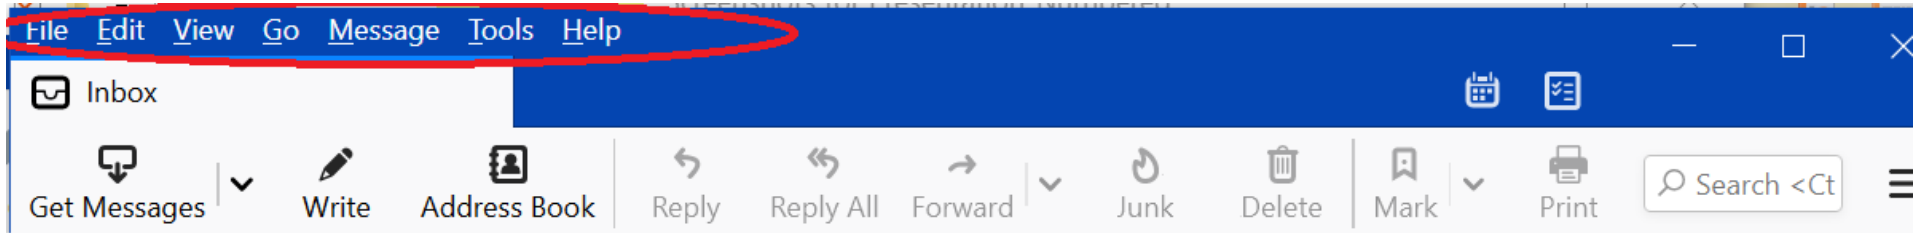

Rt-click icon bar

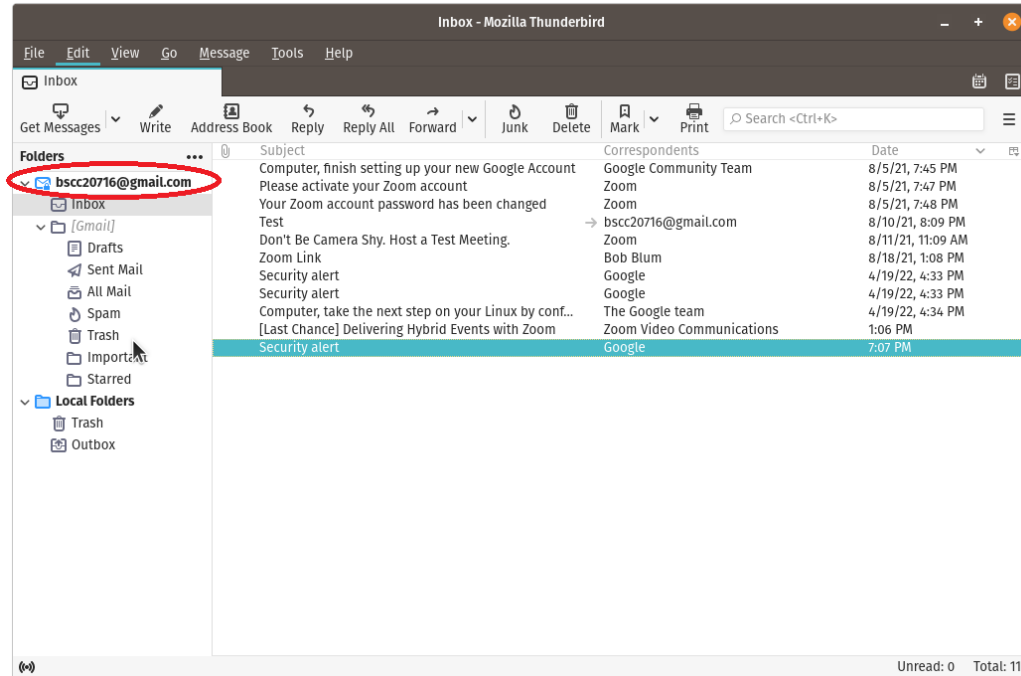

Select “Menu bar” for top-line menu

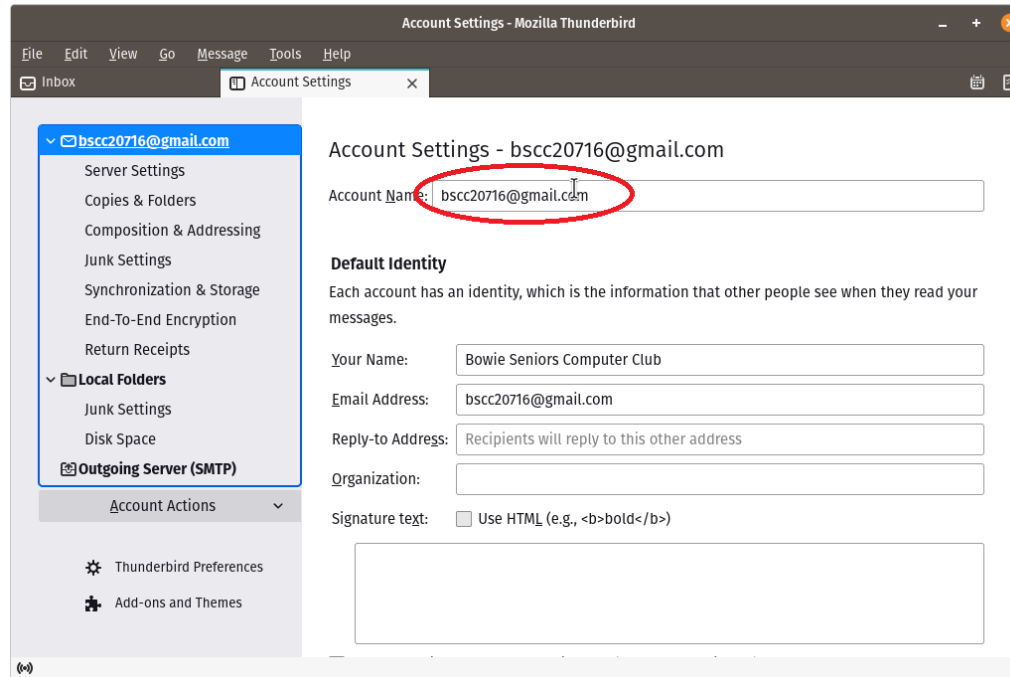

Note top-line menu

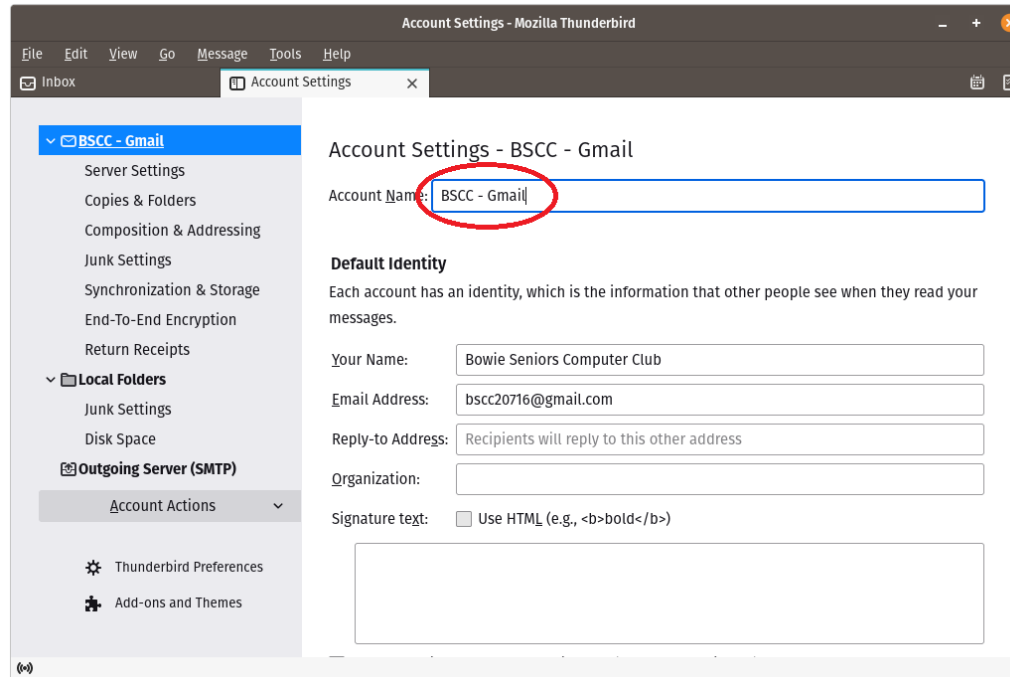

Right-click account name to bring up Account Settings (next three images)

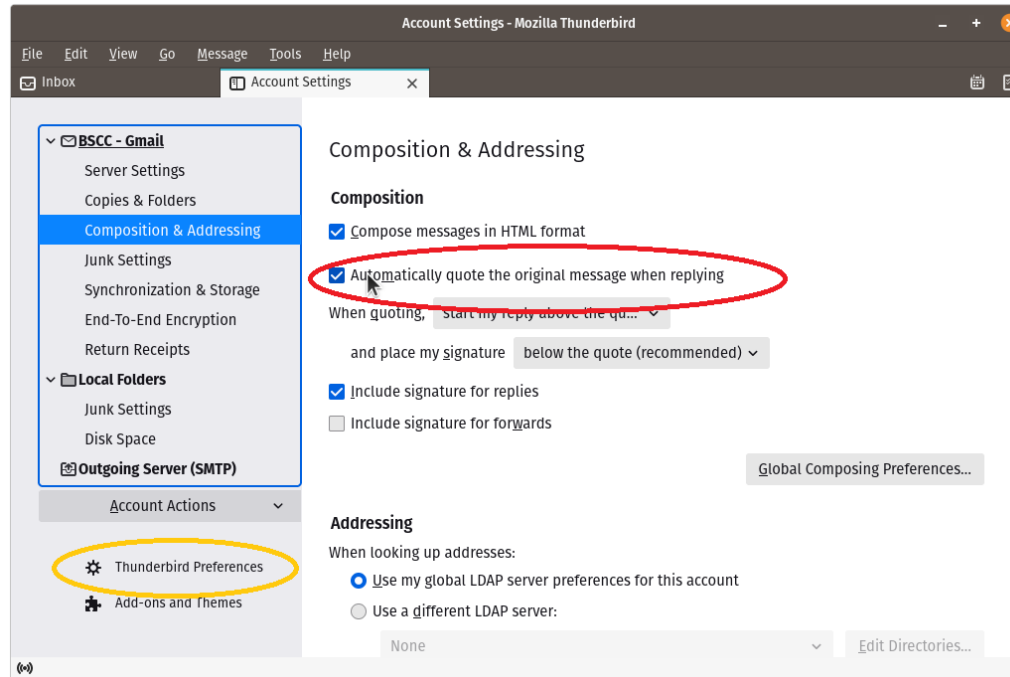

Account name now changed

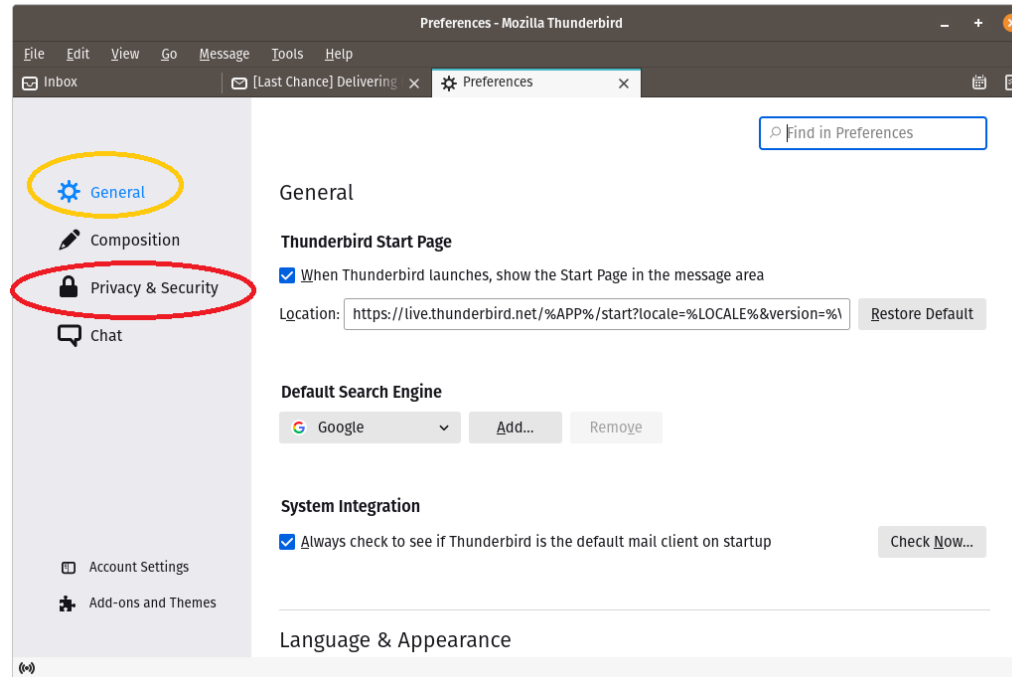

Disable quote of original message when replying (uncheck the box)

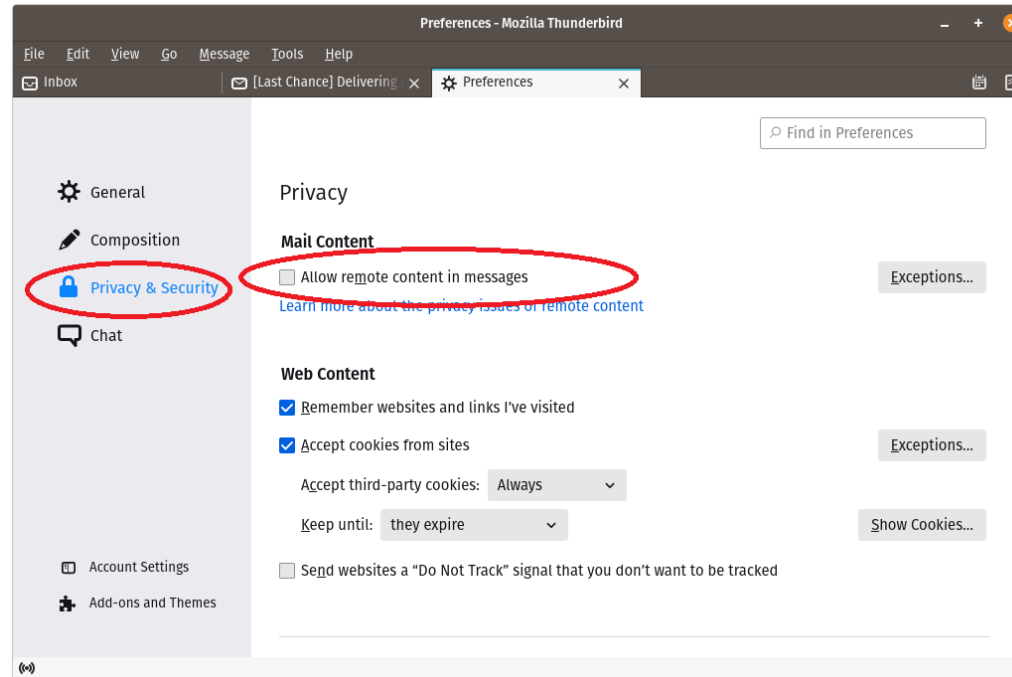

Allow remote content

(Preferences → Privacy & Security)

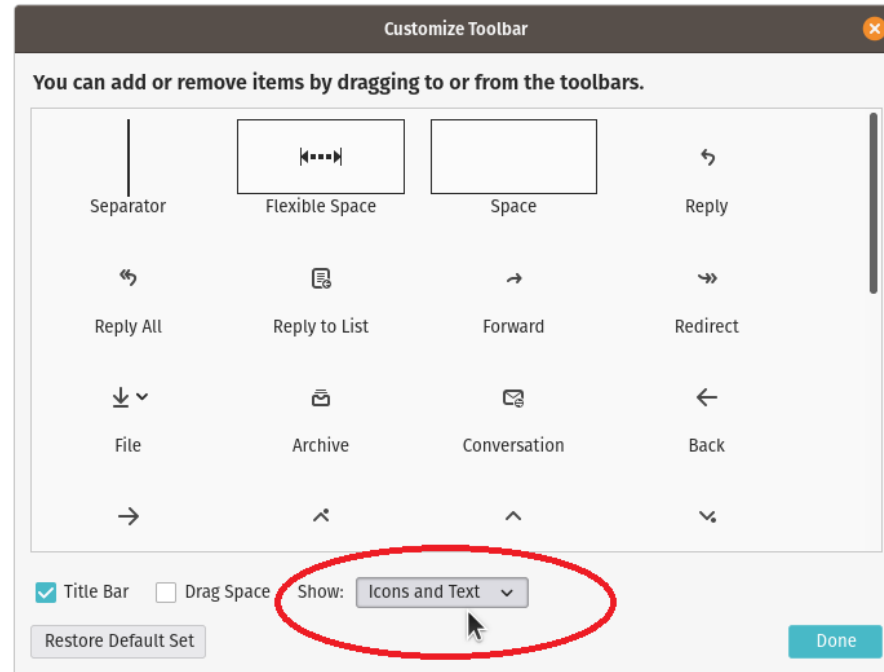

Check “Allow remote content”

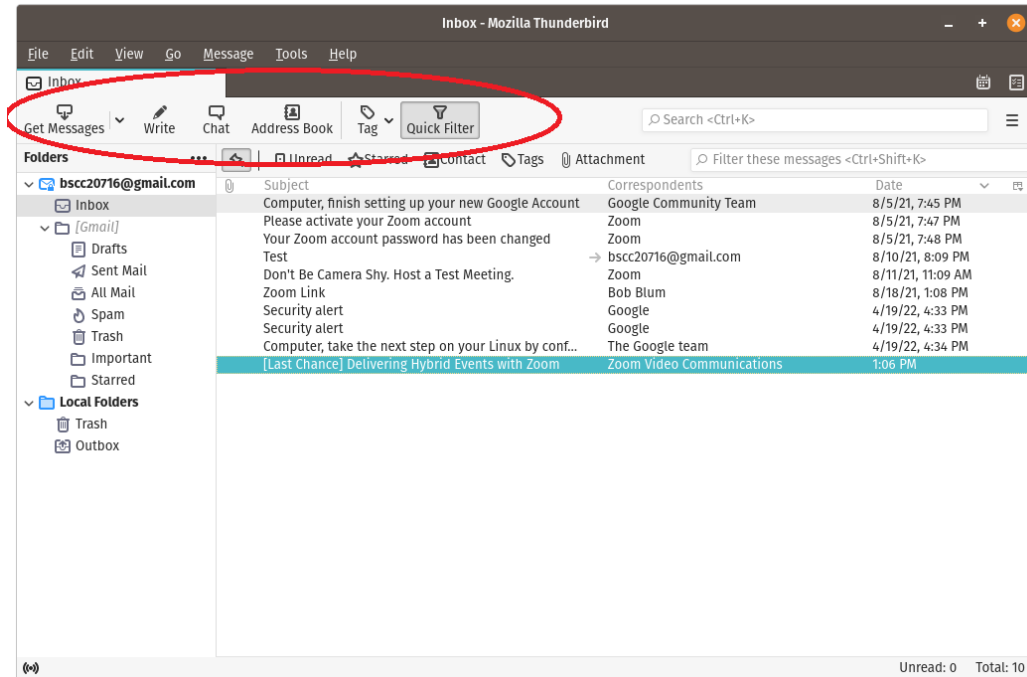

Customizing top icon bar

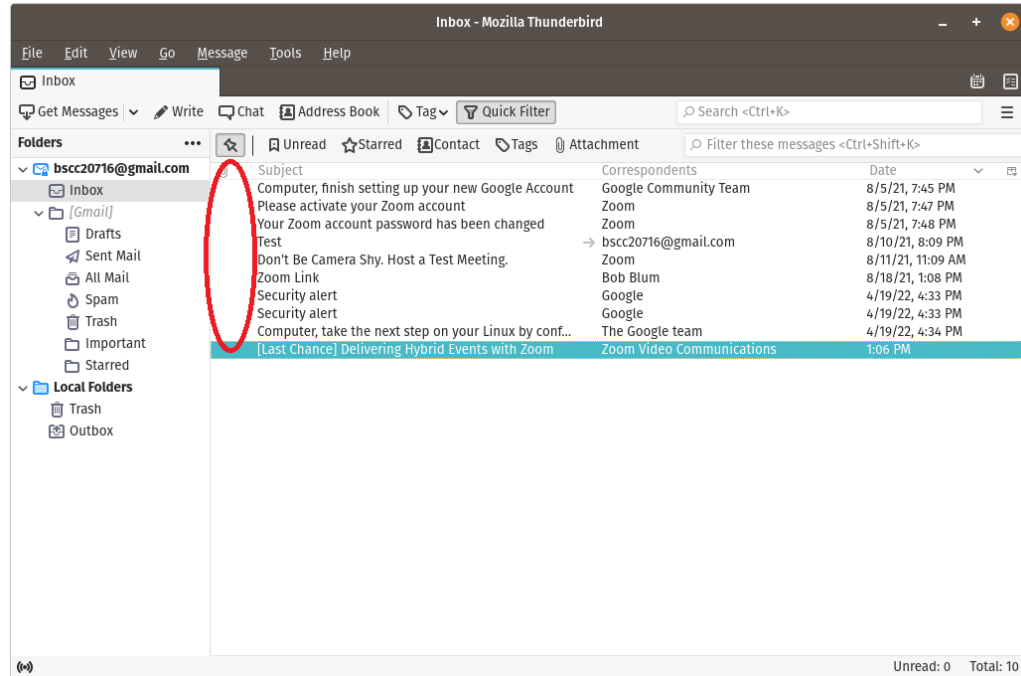

”Icons beside Text” to “Icons and Text”

Now we have rectangular icons

Remove special message tags

Remove Quick Filter Bar
