

BOWIE SENIORS COMPUTER CLUB

MEETING MINUTES FOR MAY 21, 2015

President Carl Bulger called the meeting to order at 12:30pm.

Dan Lee announced that the scheduled speaker had cancelled. The meeting was thus open membership discussions. Dan posted the following information regarding future programs;

June 4 To be determined

June 18 Apple Solutions Consultants Tony Acevedo and Tavon Jones

July 2 & 16 To be determined

Aug 6 Microsoft Sr Partner Technology Strategist Steve Deming

Bill Long announced that he has signed-up for Nomorobo's anti-robocall feature. Dennis Edgington indicated that he signed-up for it long ago but has received and logged numerous robocalls. Irv Salzberg advised that it is possible to download a special sound file that can be added to a voicemail greeting that signals the caller's carrier that the number it has called is out of service. This presumably ends the call and prevents future junk calls from that caller's list.

Dan Lee announced that Cathy White is acting to form an Apple Users Group that will meet at the Senior Center but be open to all. This lead to a discussion of "Apple vs. Windows".

Dan Lee opened the "ARS Technica" website and presented information about its features.

Bob Blum and Dennis Evans commented about "dark energy" and "dark water".

Irv Salzberg solicited and received comments about members' experience and thoughts on two-factor identification.

Bob Rapczynski solicited help regarding his effort to make his android tablet's file manager look consistent with the file manager interface presented in the tablet's user manual. The tablet's screen was displaying folders in list form whereas the manual indicates that folders are displayed in grided icons form thereby enabling drag-and-drop file management. No one was able to offer a solution.

Carl closed the meeting at 1:30pm

Meeting Minutes prepared by Bill Long, Secretary
